Fuel Pump Module

Do not replace the fuel level sensor.

Do This
Don't Do This

Condition

This condition may be caused by an improperly calibrated fuel level sensor.

Cause

Some customers may comment on erratic fuel gage readings. A typical comment might be that the gage does not go to full or moves off full too quickly.

Condition

Build Prior to VIN Breakpoints 6773574 (Chevrolet) and 6773574 (Pontiac)
2006 Pontiac Pursuit (Canada Only)
2006 Chevrolet Cobalt

Models:

Erratic Fuel Gage Readings (Does Not Go To Full or Moves Off Full Too Quickly) (Replace Fuel Level Sensor)
